

Partner/Participation Form

Organisation: City of Brugge

Additional information/websites etc. of relevant (ongoing/planned) pilots or activities:

www.toekomstvanbrugge.be – the goal of this initiative is to build the future of the city together with the citizens and to make them co-responsible for the city development. The main idea is that it is not only a participative approach but it also creates a local platform for city development.

Past (EU) project experience related to SELF:

Experience in several Interreg project (interreg A and B)

Foreseen role in the SELF project*

The city can play a role in the three WP's.
Analysis of the concrete results of “de toekomst van Brugge”
Pilot projects:
“lelijke eendjes” -> ugly areas in the city are allocated a certain budget to revive the area and to make it more attractive; how this should be done is completely up to the citizens (ownership)
Community centre De Dijk: new functions
Toekomsthuis: meeting place where several ‘themes’ find their place and where innovation happens because of cross-sectoral cooperation (unforced, by being in the same area)
The city would like to set up crowdfunding, where “finding” money is not the main goal, but to use crowdfunding to create “ownership” amongst the citizens.

Additional elements, partners and suggestions for the project, relevant EU Programme*
